INDUSTRIAL PROCESS DATA MANAGEMENT

Today’s industrial environments are under increasing pressure to accurately measure and report usage, waste, status, and condition of their process materials and capital equipment. At AW-Lake, we understand this pressure and the importance of getting your data where you need it and in the format you need it so you can record, report, analyze and make adjustments and decisions based on it. We continually strive to develop tools to help make this process easier for you. As technology changes, so do the data requirements. We provide sensors with the output you want – frequency, analog, voltage, Modbus or HART. Setup and trouble-shooting is made easier through the use of our PC and mobile apps.
