

TN-F Series Flanged Turbine Flow Meter

Common Uses

The TN-F Turbine Flow Meter is a cost effective turbine meter that can withstand the demands of the most rigorous flow measurement applications. It is ideal for light viscosity fluids like water, glycol, or solvents for liquid flow measurement on or off the oilfield. These meters offer many benefits, including:

- **Accuracy & Reliability:** $\pm 1\%$ of reading
- **Electronic Integration:** This meter can accept a variety of existing electronics, including the EDGE sensor.
- **Simplified Maintenance:** Rotor replacement kit enables the rotor to be replaced in just 2-3 minutes.
- **Rugged & Cost Effective:** All stainless steel construction and tight machining tolerances make for excellent durability/long life.
- **Compatible with Current Systems:** Easy to install drop-in replacement of other brands of flow meters.

Technical Specifications

General Meter Data	
8 Flow Ranges	5.0 to 5,500 gpm (across all meter sizes)
Measuring Accuracy	$\pm 1.0\%$ over full range with 1cP fluid $\pm 2.0\%$ for TN-0.5-3 and TN-103
Repeatability	$\pm 0.1\%$ over full range
Max. Operating Pressure	up to 5,000 psi (see chart next page for individual meter specs)
Calibration	Water (NIST traceable)
End Connections	Flange Standard ASME Raised Face (RF)
Turndown	10:1
Operating Temperature Range	-100°F up to 250°F (up to 850°F with special coil)

Meter Materials of Construction

Body	316 stainless steel
Rotor	416 stainless steel (CD4MCu)
Rotor Supports	316 stainless steel
Rotor Shaft	Tungsten carbide
Sleeve Bearings	Tungsten carbide

Compatible Electronics

Standard (included)	Pulse output
EDGE Sensor	Pulse, analog, or Modbus outputs
Digital Display	EX rated, flow rate & total, analog and pulse outputs

End-of-Life Disposal:

At the end of its service life, this product and its associated electronics should **not be discarded with municipal solid waste**. We strongly recommend recycling the unit in accordance with **all applicable local, state, and federal regulations**. Electronic components may qualify as universal waste and should be handled through an appropriate recycling or collection program. Responsible recycling supports our commitment to environmental stewardship under **ISO 14001**.
